Job Title: Backend Engineer
Experience - 0-2 years
Location - Mumbai

About the Company: LogIQids, based in Mumbai, is a rapidly growing, profitable edtech organization in the K-9 sector. Focused on enhancing reasoning and problem-solving skills, we have impacted over 2 million students. With a 4.8 out of 5 Google Play Store rating, we are loved and trusted by students, parents, and schools alike.

After raising pre-series A, we are looking to hire people across domains. With a young, energetic team, we're driven by a culture perfect for those who want hands-on experience in creating new products and building core systems from the ground up. If you're eager to make a real impact and accelerate your growth, LogIQids is the place to be!

Responsibilities:

- Collaborate with a team of developers, designers, and product managers to design, develop, and maintain web applications using Python and Django frameworks.
- Write efficient, reusable, and scalable code following best practices and coding standards.
- Develop and integrate RESTful APIs for seamless data exchange between front-end and back-end systems.
- Design and implement database models and optimize database performance.
- Participate in code reviews to ensure code quality, consistency, and security.
- Identify and troubleshoot issues, debug and resolve software defects in a timely manner.
- Contribute to the continuous improvement of development processes and methodologies.
- Develop and maintain technical documentation related to the projects you are working on.

Requirements:

- Good knowledge of Python with knowledge of Python web framework Django
- Proficient understanding of code versioning tools such as Git
- Knowledge of relational databases (e.g. PostgreSQL, MySQL).
- Excellent problem-solving skills and the ability to work both independently and collaboratively.
- Experience with Agile development methodologies is preferred.
